Imtiyaz Ali Khan [Portfolio]

imtiyaj.codes@gmail.com | linkedin.com/in/imtiyaz-khan-92b917334 | github.com/ali-imtiyazkhan

SUMMARY

Backend-focused Full Stack Developer with expertise in building scalable web applications and RESTful APIs. Proficient in Node.js, Express, and databases like MongoDB and PostgreSQL. Passionate about clean code, problem-solving, and continuous learning.

TECHNICAL SKILLS

Frontend: React, Next.js, Tailwind CSS, HTML, CSS **Backend:** Node.js, Express.js, WebSocket, WebRTC, Socket.io, Hono, REST APIs
DevOps & Cloud: Docker, CI/CD, Cloudflare Workers, Git & GitHub **Languages:** TypeScript, JavaScript, C++, Java, C, Python
Databases & Messaging: PostgreSQL, MongoDB, MySQL, Prisma ORM, Redis, Kafka, BullMQ

PROJECTS

CodeSync – Real-time Collaborative IDE **[GitHub]** *Tech Stack: Next.js, TypeScript, Node.js, Socket.io, WebRTC, Prisma, PostgreSQL, Docker*

- Built a collaborative platform syncing local VS Code with a browser Monaco editor via a custom VS Code extension using Socket.io.
- Implemented a 'Propose → Review → Apply' diff system, WebRTC HD video/audio calls, and an Excalidraw-powered shared whiteboard.
- Integrated AI-powered code insights for inline explanations, test generation, and performance analysis during live sessions.
- Structured as a Turborepo monorepo with shared TypeScript packages across the web app, Node.js backend, and VS Code extension.

CodeMate – LeetCode Pair Programming Extension **[GitHub]** *Tech Stack: Chrome Extension (MV3), Node.js, Socket.io, WebRTC, Redis, Next.js, TypeScript, Docker*

- Built a Chrome extension that shows live presence counts on every LeetCode problem page and enables instant partner matchmaking.
- Used Redis sorted sets with TTL auto-expiry for accurate per-question presence tracking and Socket.io for real-time room management.
- Implemented WebRTC for peer-to-peer audio/video calls and an in-extension Shadow DOM chat UI with no style conflicts on LeetCode pages.
- Shipped a Next.js dashboard with a live leaderboard; deployed backend and Redis via Docker Compose.

EmailBot – AI Email to WhatsApp **[GitHub]** *Tech Stack: Node.js, TypeScript, Next.js, Express, BullMQ, Redis, PostgreSQL, Prisma, Google Gemini, WhatsApp Cloud API*

- Polls Gmail and Outlook via OAuth2, scores each email 1–10 using Google Gemini, and forwards priority emails directly to WhatsApp.
- Designed an event-driven pipeline with BullMQ and Redis for reliable async processing; AI refines WhatsApp replies before sending via email.
- Secured endpoints with Helmet.js, Zod validation, and rate limiting; Turborepo monorepo with separate API, dashboard, and worker services.

Postboy – API Testing Tool **[GitHub]** *Tech Stack: Next.js, TypeScript, Node.js, Express, MongoDB, REST APIs, Docker*

- Built a Postman-like API testing platform with request builder, response visualisation, collections, environment variables, and auth headers.
- Enabled import/export of API configs, JSON payload validation, and containerised backend services for easy deployment.

ACHIEVEMENTS

- Solved 300+ LeetCode problems, strengthening data structures and algorithms through consistent daily practice.
- Strong foundation in DSA, Computer Networks, DBMS, Operating Systems, and COA with GATE-level problem-solving practice.

EDUCATION

Bachelor of Technology (CSE) Government Engineering College, Ajmer Aug 2023 – Jun 2027
